

the sign of quality

Countless crinkles for  
endless possibilities.

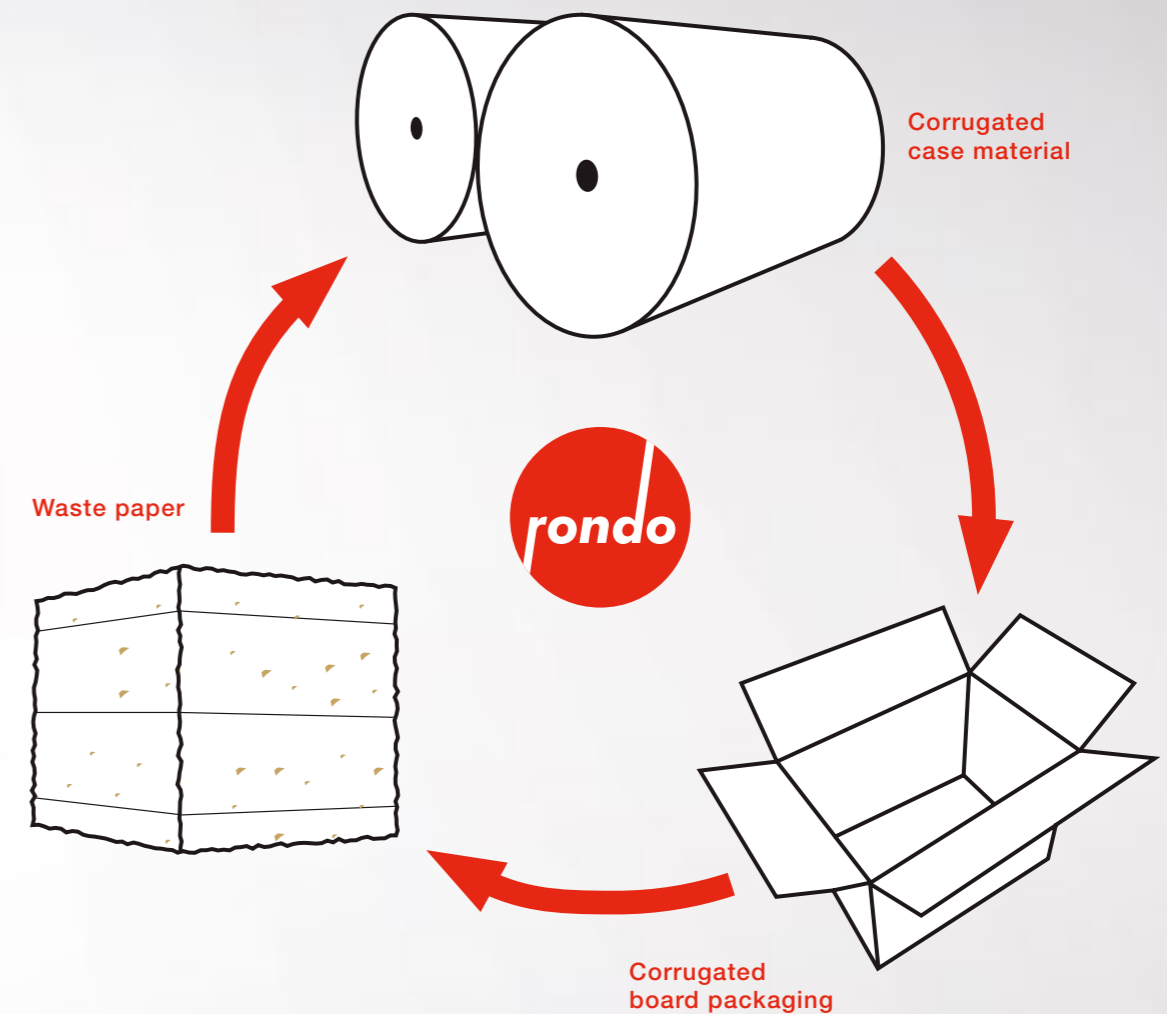

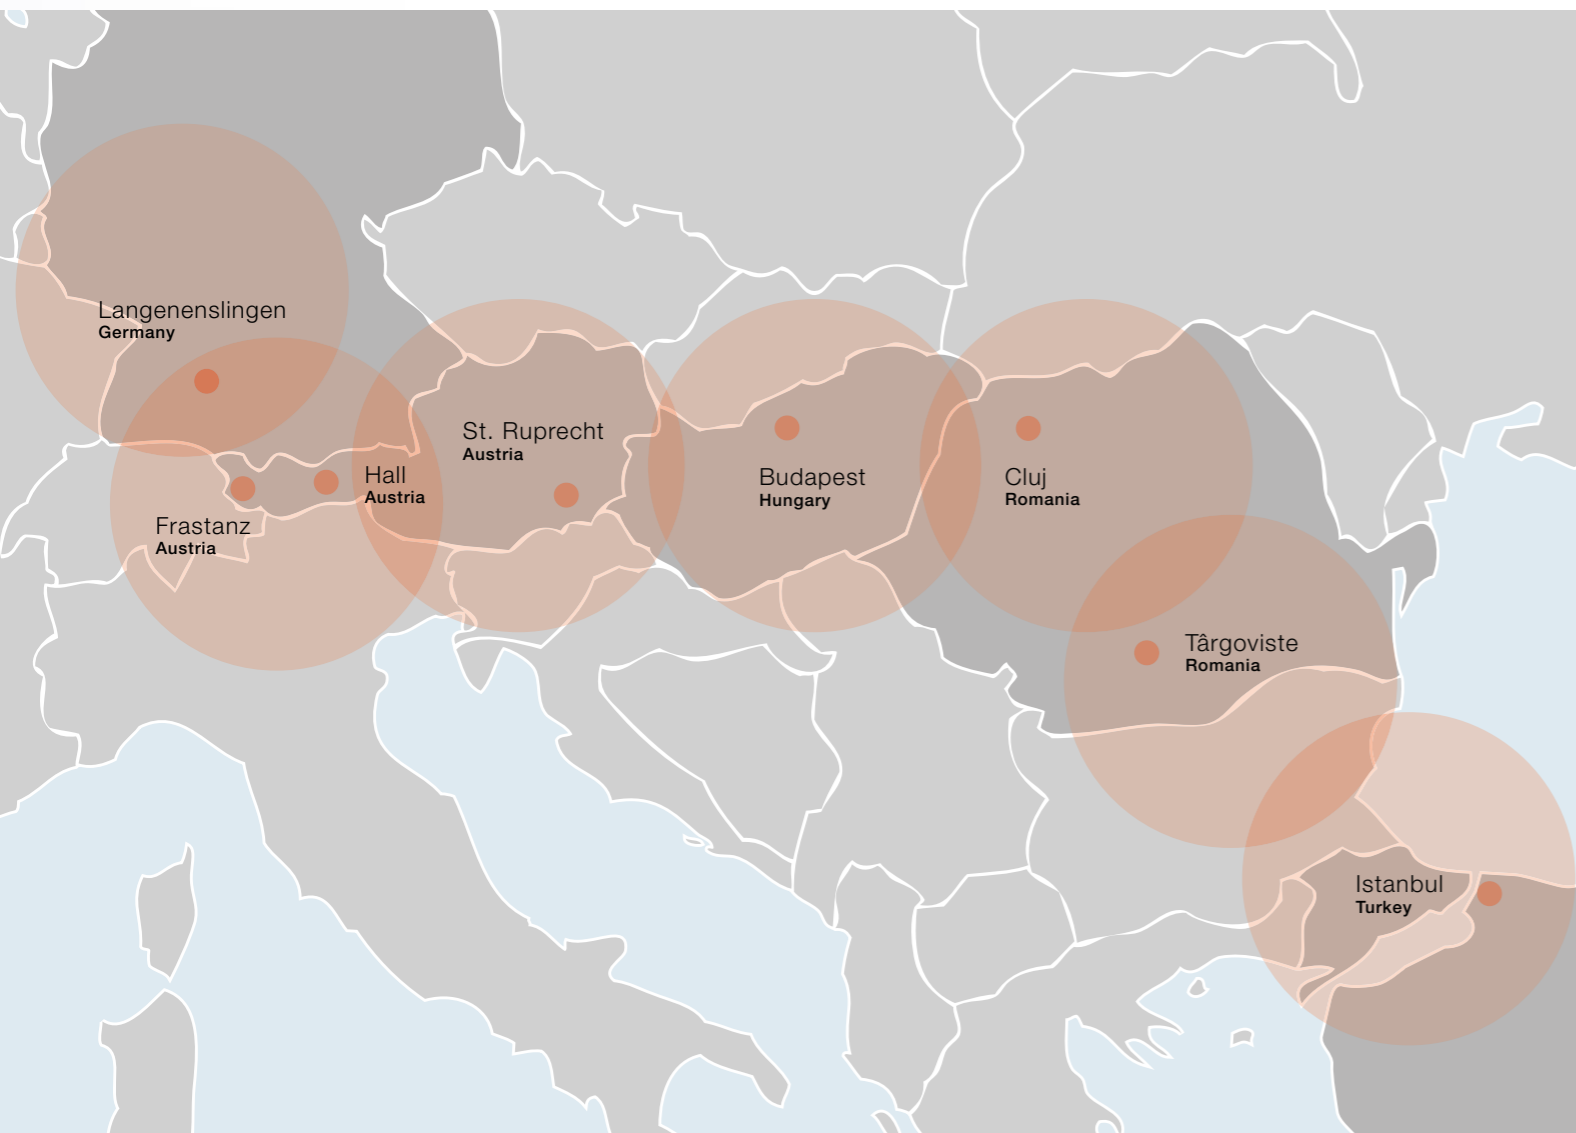

Corrugated board packaging  
by Rondo.

## We are future-oriented by tradition.

Rondo Ganahl AG is a long-standing Austrian family business. Reliability, long-term thinking and a responsible attitude towards resources enable us to create permanent relationships with customers, colleagues, suppliers and the public. Our organisational structure is deliberately simple, making us quick and efficient. We have decentralised entrepreneurial responsibility in order to account for local circumstances on a large scale as well.

Our corrugated board plants in Austria, Hungary, Romania and Turkey shape the market. Continual investments enable us to secure our leading position with regard to technology, to open up new product segments and to create more growth potential.

Fulfilling our customers' wishes is one of the fundamental principles of our company!

## Use rather than waste.

Recycling management is one of the business principles of Rondo. We recycle up to 120,000 tons of waste paper every year in our paper mill in Frastanz. Consequently the containerboard that is produced from it is a 100% recycled product that is used in the corrugated board industry (on a large scale in our own corrugated board plants). The packaging manufactured there can be recycled entirely.

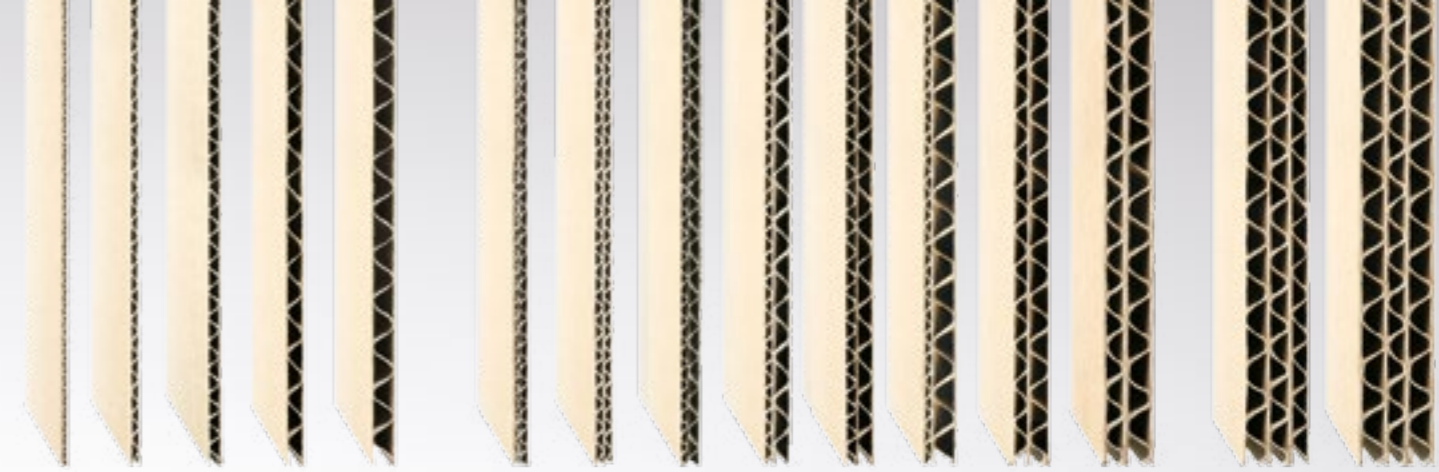

Our know-how also becomes apparent when you look at the collection of waste paper. In our collection plant in Hall in Tyrol, we process approximately 60,000 tons of waste paper so that it can be returned as single-origin raw materials in the paper industry. Consistently environmentally friendly and sustainable. Rondo Ganahl AG closes the circle!

## Welcome to the realm of possibilities.

There is nothing that spurs us on more than finding an optimum solution for everything ranging from safe and attractive transport packaging to precisely die-cut machine packaging and retail packaging with high-quality prints or attention-getting displays: from the idea to product development and the production process down to delivery on time.

The national and international awards we have been receiving for years show proof of the innovative strength and quality of Rondo.

The greatest credit we receive, however, is the long-standing partnerships that we maintain with many of our customers.

## We multiply state-of-the-art technology with premium service. The result: quality.

Everything at Rondo is much influenced by quality. You need people with brains for that. Our personnel comprise competent and reliable employees who continue to develop their know-how by means of ongoing further training. They ensure the consistent implemen-

tation of your personal wishes in all phases of production. Our staff and machinery are at the highest level of technology and the perfect combination for ensuring optimum product quality. Our service is your added value.

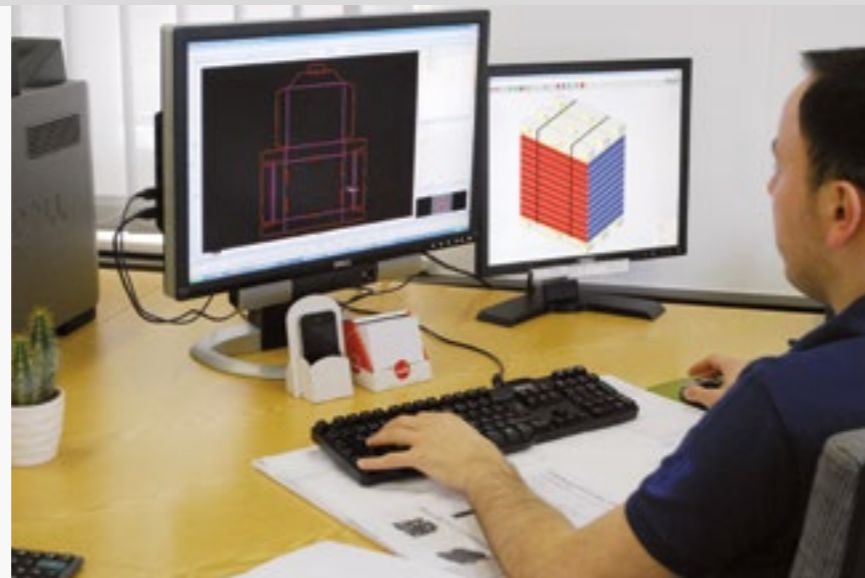

## Die-cut packaging.

Innovative die-cutting and printing technology make attractive advertising media out of corrugated board packaging.

## Packaging development using CAD.

Each of our corrugated board plants disposes of its own development department.

## Folding boxes.

Advanced manufacturing technology guarantees prime functionality and optimum stability.

## Corrugated board.

We produce high-quality products in state-of-the-art corrugated board plants.

## Quality management.

Our certified quality management system (ISO 9001-2000) and our elaborately equipped testing laboratory guarantee the quality of your products.

## Packing at the customer's site.

Our packaging is convincing with its excellent runnability in automated processes.

On site.  
Before others.
